BROOKLYN OUTFITTERS

"The Store that Satisfies"

266, 268, 270 MAIN STREET, NORWICH, CONN.

On Guard Against Weevils.
It is still the custom among sailors to dip the biscuits twice on the table before eating them. The reason is that many years ago the biscuits served to the sailors were so bad that before eating them the sailors used to shake out the weevils. The custom, however, though no longer necessary,

Swiss Tidal Current.
The swiftest tidal current in the world is that between the islands of Jura and St. Pierre, off the Scottish coast. According to the official charts, the speed of the current here is nearly eleven miles an hour. No river, except a mountain torrent, runs as fast as this.

A Great Jewel.
We publish beautiful editions of books, to be sure, and thousands of people enjoy them; but in ancient times the expense that we spread thinly over a thousand volumes was all compressed into one, and it became a great jewel of a book, a heavy fellow with its weight in gold—Lapworth's.

The Real Thing.
Jack was stout and his face was round and rosy. He was sitting on the steps in front of his home when a group of boys passed, and they immediately began to tease him about having the mumps. He took it for a while and then replied: "Mumps, nothing, that's just cheeks."

Ants Sterilizing Their Stores.
As a mark of what in human beings would be termed great intelligence, it has been noticed that when storing up seeds or grains for winter use, ants cut out the life-germ. Since their storehouses are under ground, this is necessary to prevent the grain from sprouting and growing.

Wanted "Jewelry" Currency.
Jimmy received two dollar bills for Christmas and was quite excited about it. He wanted to put them in his savings bank, but didn't understand how to do it. So he ran to his father and exclaimed: "Daddy, daddy, will you please give me two jewelry dollars for these?"

One Disquieting Symptom.
Johnny who lived in the flat down stairs came up one afternoon to see Anna May, who had been sick for a long time. When his father came home that night he asked Johnny how he had found Anna May. "Well," said Johnny, "she's all right, but she talks pale."

Coal Prospects.
According to the estimate of the United States geological survey, one fourth of our anthracite is gone; but we have enough left to last us 100 years at the present rate of consumption. We have in this country enough coal of other kinds to last 1,000 years at the present rate of consumption.
